Index of key words

3-D, 133
3-D reconstruction, 223

Acoustic microscopy, 103
Alpha-actinin, 133
Artificial intelligence, 133

Beam-splitting tube, 181
Biological thick sections, 1
Blaschke–Petkantschin formula, 249

CSLM, 151
Ca^{2+}, 133
Carbides, 63
Carbon, 63
Catalase, 81
Cavalieri estimator, 315
Central nervous system, 223
Chord-length density, 285
Compact sets, 301
Composition measurement, 39
Computer graphic methods, 193
Computer graphics, 123, 133
Computer simulation, 39
Conductive coating removal, 75
Confocal laser microscopy, 171
Confocal microscopy, 123, 151
Confocal scanning light microscopy, 249
Confocal systems, 161
Convergent beam diffraction, 39
Correspondence principle, 315
Covariogram, 285, 315
Cross-validation, 233
Cryo-electron microscopy, 81
Curvature, 249

Debris removal, 75
Density estimation, 233
Deposits, 63
Diaminobenzidine, 223
Digital imaging, 133
Digital imaging processing, 171
Disector, 93, 249
Dislocations, 23
Dot counts, 269
Draining, 81
Dynamical model, 39

EELS, 1
Electron beam-induced reaction, 31
Encapsulation, 63
Energy filtered images, 1
Environmental cell, 51
Euler's summation formula, 285

Ferritin, 81
Fluorescence, 151, 171
Fluorescence microscopy, 133
Forest survey, 269

Fourier transform, 269, 315
Fourier transformation, 301
Fractionator, 93
Full resolution, 181

Gastrointestinal tissue, 75
Geometrical probability, 269, 301
Grading, 315

HRP-histochemistry, 223
Heart, 301
Hot stage, 51

Ill-conditioning, 233
Image processing, 123, 205, 223
Image restoration, 133
Immunocytochemistry, 133
In situ SEM, 51, 63
Independent sections, 93
Integral equations of the first kind, 233
Ion etching, 51
Iron, 63
Isotropic probes, 249
Isotropy, 315

Lattice parameter measurement, 39
Least squares, 233
Line term, 315
Line transects, 269
Line-plot survey, 269
Low-pass distortion, 205

Maceration, 93
Maximum penalized likelihood, 233
Mercury, 75
Methane, 63
Microprocessor control, 171
Microscopy, 301
Microstereology, 205
Missing cone problem, 205
Monatomic steps, 23
Monte Carlo methods, 301
Morphometry, 301

Neurons, 223
Noisy systems, 233
Non-parametric maximum likelihood, 233
Non-parametric regression, 233
Nucleator, 93, 249
Number estimation, 93
Numerical differentiation, 233
Numerical integration, 315

Optical section, 171
Optical serial sectioning, 205
Orthogonal series expansion, 233

Particles, 63, 249
Pattern recognition, 133
Phase retrieval, 103

Phase-change, 81
Phospholipid, 81
Photon correlation spectroscopy, 233
Point count, 269
Point counting, 315
Point-bar distance distribution, 285
Positron emission tomography, 233
Praseodymium oxide, 31

Ray-tracing, 123
Reconstruction, 193
Reflectance function reconstruction, 103
Reflection electron microscopy, 23
Regionalized variable, 315
Regionalized variables, 301
Regularization, 233
Ridge regression, 233
Roughness functionals, 233

STEM, 1, 23
Sampling, 249
Scanning electron microscopy, 75
Scanning microscopy, 151
Section pairs, 93
Selector, 93, 249
Singular value decomposition, 233
Slice term, 315
Smooth muscle, 133
Solution-precipitation, 63
Star volume, 249
Stereo microscopy, 181
Stereology, 93, 249, 269, 301, 315
Stereophotography, 223
Stratified sampling, 269
Surface area, 249
Surface mobility, 63
Surface preparation, 51
Systematic sampling, 269, 285, 301, 315

Test systems, 315
Thermal facetting, 51
Thin films, 81
Three-dimensional imaging, 151, 161
Three-dimensional microscopy, 171
Three-dimensional reconstruction, 205
Tomographic reconstruction, 187
Tract-tracing, 223
Transitive methods, 315

Ultrasonication, 75
Unfolding, 233
Uniform random points, 249

Variance approximations, 315
Variance of volume estimator, 285
Visualization, 123
Volume, 249
Volume estimation, 269, 315

Wicksell's corpuscle problem, 233

X-ray microtomography, 187
Xenopus laevis, 223

Zitterbewegung, 269, 285, 315

Index of authors

Aggarwal, J.K., 205
